**c. If "Yes," then a PIA is required. Proceed to Section 2.**

## **SECTION 2: PIA SUMMARY INFORMATION**

**a. Why is this PIA being created or updated? Choose one:**

While the extractor server utilizes proprietary software to extract the data from the Resume Builder server it utilizes Hyper Text Transfer Protocol - Secure (HTTPS) to transfer data directly to the storage (RESUMIX) server. The Extractor Server in turn pulls this data from the ORACLE database and workstations with the proprietary desktop client software it searches through the data and selectively reads records based on predetermined criteria. An administrative workstation, with an attached scanner also has the capability to write and store information to the main Server. The data collected is resume data (name, work history, telephone).
